API-650's 8th edition and AWWA D-100 have largely similar provisions for seismic design in ground-supported tanks. Small differences appear in the details: the former uses the structure coefficient in the equation for overturning moment, while the latter uses the importance factor.

API Tanks-Dixie Southern

The API Standard 2000 5th edition takes into account tank volume, liquid flow, and temperature change. It was written as a basis for the pressure control of hydrocarbons, and considered industrial tanks as well. It is this 5th edition that is probably in widest use today. In 2009, this was updated to the API Standard 2000 6th edition. Note that
