Properties of Waves Flashcards | Quizlet

An Arrow (1 kg) travels with velocity 40 m/s to the right when it pierces an apple (2 kg) which is initially at rest. After the collision, the arrow and the apple are stuck together. Assume that no external forces are present and therefore the momentum for the system is conserved. What is the final velocity (in m/s) of apple and arrow after the collision? What is the initial kinetic energy of ...

Can someone help? | Yahoo Answers

Amplitude -Maximum distance a wave varies from its rest position Wavelength -The distance from two corresponding (or the same) parts of a wave. Frequency -How many waves can pass a given point per second, measured in Hertz (Hz) Crest -Highest point of a wave Trough -Lowest point of a wave. Energy -Is the ability to do work.
